To whom it may Concern

Gemini Tech Construction has had a working association with **Build Aid** since the mid 90's.

We have attended numerous workshops and seminars over the years in which **Build Aid**, through training, were able to assist us, in particular with the quantifying of plans and also a better understanding of various products used in the construction industry.

Build Aid is a great way for Contractors and the average person to obtain an accurate Bill of Quantities from plans, be it for Commercial, Industrial or Domestic buildings.

I would recommend more Architects and Construction Companies utilize their professional and friendly services.
